

Coming this fall!

Pencil Box Heater + Touch Screen Heater Controller

- When used with the Flexion source, the pencil box heater needs its own controller PST-CHC-TS
- When used with the Easyspray source, the pencil box heater may use either the OEM built-in controller or the touch screen controller

Model numbers: PST-PH Pencil Box Heater;

PST-CHC-TS: Touch Screen Heater controller

PST-PH Pencil Box Heater

- Developed with the expertise accumulated over 10 years of excellence in nanoLC column heating
- Stylish and practical hard engineering polymer construction
- Accommodates up to a 15 cm long column with fittings without coiling
- Electrically insulating heater surface for safe heating of metal fittings
- Even heating up to 60 °C
- The heater comes with support brackets for secure mounting on both the Flexion and the Easyspray sources close to the MS inlet
- Please call to discuss installing the pencil box heater on other sources.

PST-CHC-TS Column Heater Controller

- All digital temperature sensing
- Touch screen control
- +/- 0.1 °C temperature stability
- Temperature switching between two or more temperatures
- More built-in functions in progress
- Software upgradable by user

The Easyspray and the Flexion sources are Thermo products
